

Vanton's Commitment to Rapid Delivery

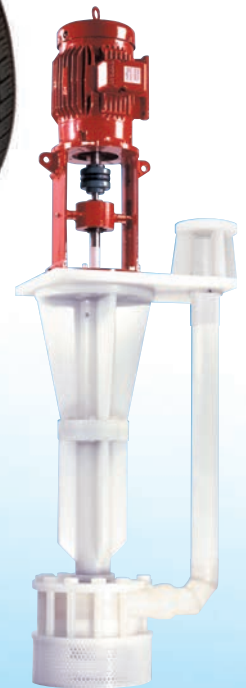

If you need a pump to handle corrosives, aggressive or ultrapure fluids, long wait times are generally not an option. That's why Vanton is committed to delivering the pump you need, where and when you need it. Given the extended delivery times often imposed by other manufacturers, this **Vanton AdVantage** becomes very clear. And, our commitment to quick delivery is further reflected in our investment in inventory, with over 2,000 different, locally sourced, injection molded components and spare parts on hand at all times.

All of our pumps are engineered products, and with over 200,000 units in the field serving a wide range of demanding applications,

we manufacture every one to the optimal specification for its designated function. At Vanton, it's never about shipping a pump from stock. Our combination of engineering, reliability, and availability, coupled with the logistical know-how to get you what you need **fast**, makes for a truly exceptional pump buying experience. And, no one does what we do with thermoplastics.

Give us a call at **908.688.4216**, email us at mkt@vanton.com or use the QR code below, to access our web site and put us to the test. We guarantee you'll speak with a pump-savvy staffer capable of solving whatever pump issues you throw at them. And, we'll work hard to get you the pump you need in less time than you thought possible. It's just one more **Vanton AdVantage**.
